

Robinson Manufacturing Limited

Roof Truss, Ecojoist® and Specialist Joinery Manufacturers

Robinson Manufacturing Environmental Policy

Robinson Manufacturing recognise that our business operations have a significant impact on the environment.

We are committed to minimising the impact that our business activities have on the environment and to meeting or exceeding legislative requirements.

We have been granted certification to the PEFC TRADA-TRAK chain of custody scheme and we actively seek to only partner timber suppliers who operate a policy of responsible timber management.

Robinson Manufacturing will not knowingly use species of timber that are prohibited or are not from legal sources. We will endeavour to only work with suppliers who can demonstrate their environmental responsibility and awareness.

Robinson Manufacturing will actively seek to reduce the consumption of raw materials within its operation and operates a policy to recycle wherever possible. We will identify and manage any risks or hazards whilst seeking to prevent pollution and limit the level of harmful emissions.

Our production processes are designed to minimise waste and our preferred finishing products are water based.

We aim to continually improve our environmental performance and will actively work with any organisation and stake holder to achieve our goals.

All our employees undertake training and awareness of the company policy and its implications on themselves, the business and the public.
